

Talk with your child about the book before they read it.

- Look at the front and back covers together talk about what this book might be about.
- Look at some of the pictures together. Ask questions such as:
 - Can you think of any very loud noises?
 - Can you think of any very quiet noises?
- Look at the tricky word decibels on page 3. Help your child to read it and talk about what it means. Talk about how other things are measured.

During reading

Encourage your child to read the book at their own pace. If your child gets stuck reading a word you could use the following prompts:

- Try to sound out the word.
- Go back to the start of the sentence and have another go.
- Look at the picture to help you.

Tricky words

Here are some tricky words that your child will read in this book:

people their called noise vibration decibels measured musician

What's That Noise?

Contents

A noisy start	2
Shhhh! I'm sleeping	4
Feeling noise	6
Breaking glass	8
Lift-off!	10
Under the sea	12
The biggest bang	14
Making a noise	16

Chloe Rhodes
Character illustrations by Jon Stuart

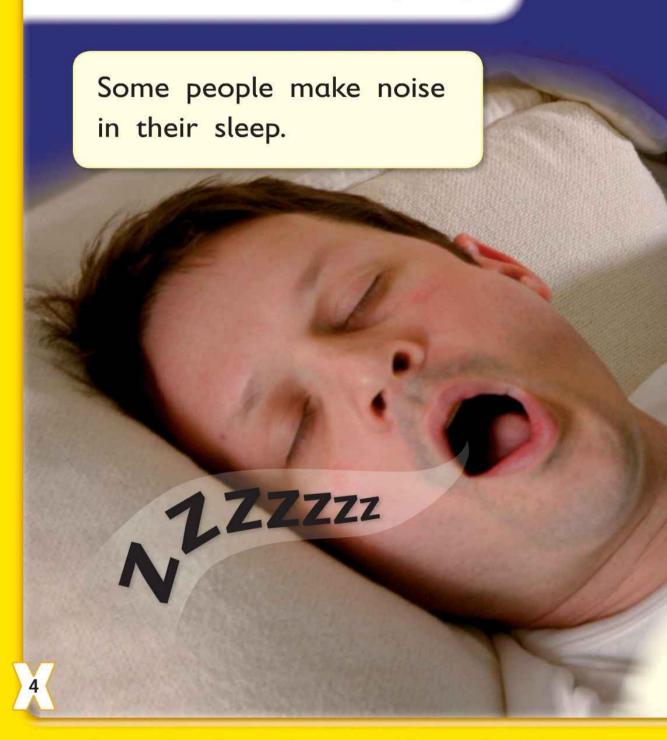

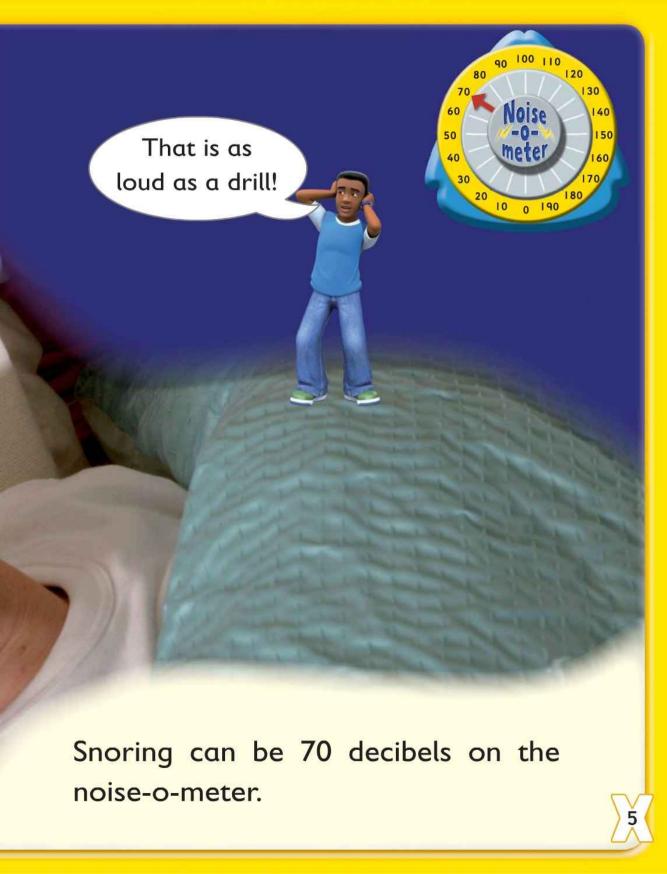

We all make noise.
We start as soon as we are born.

Noise is measured in decibels. A baby crying is 60 decibels on the noise-o-meter.

Shhhh! I'm sleeping

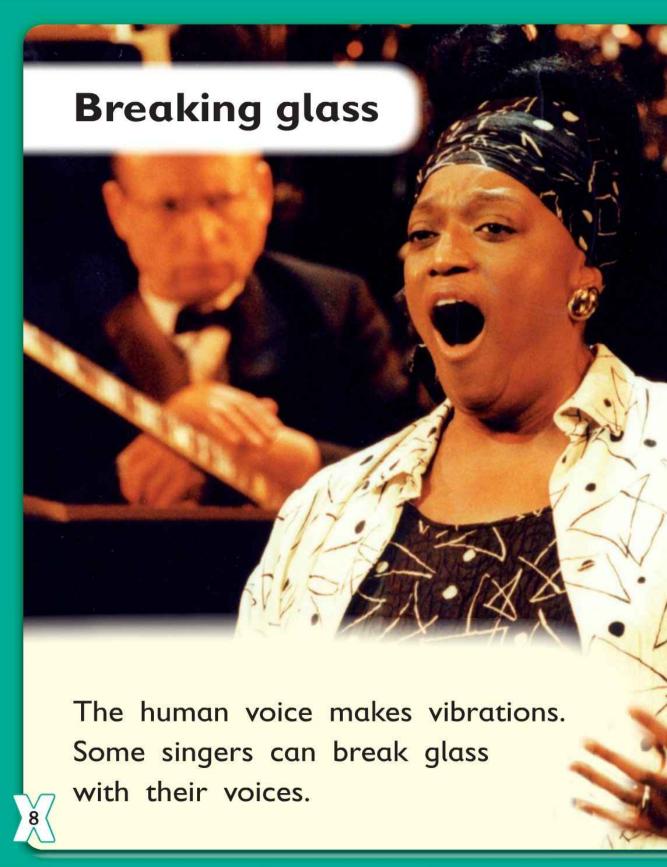

People who are deaf can feel noise. Evelyn Glennie is a deaf musician.

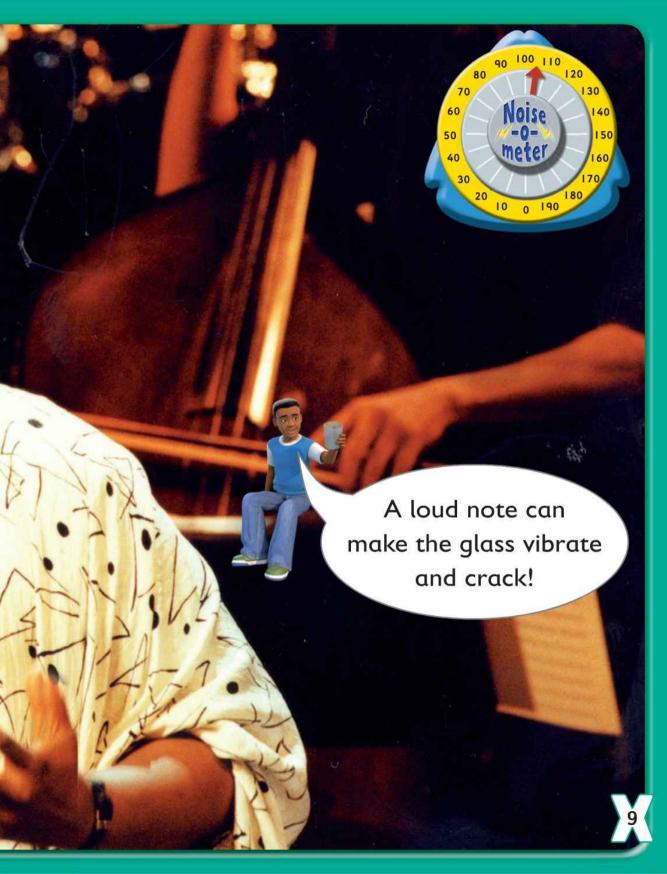

Noise makes things vibrate. Evelyn Glennie uses vibration to help her play.

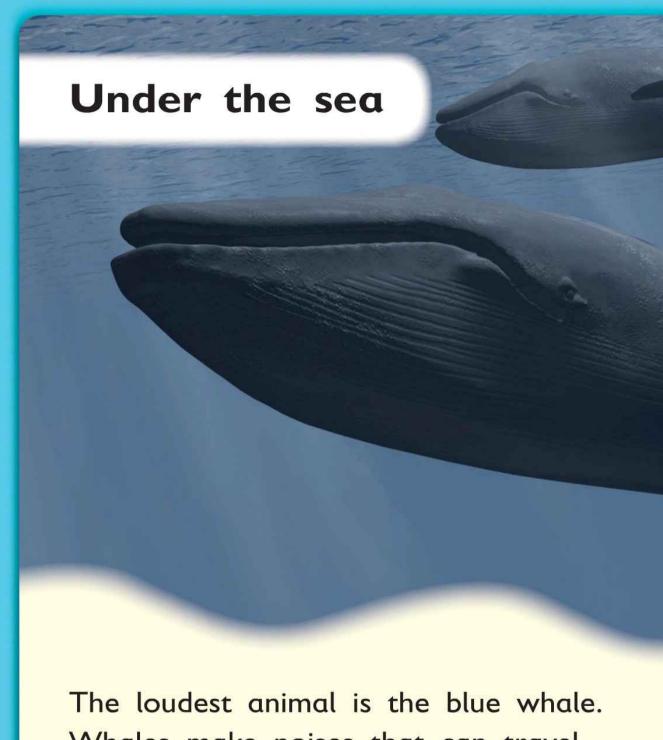

Lift-off!

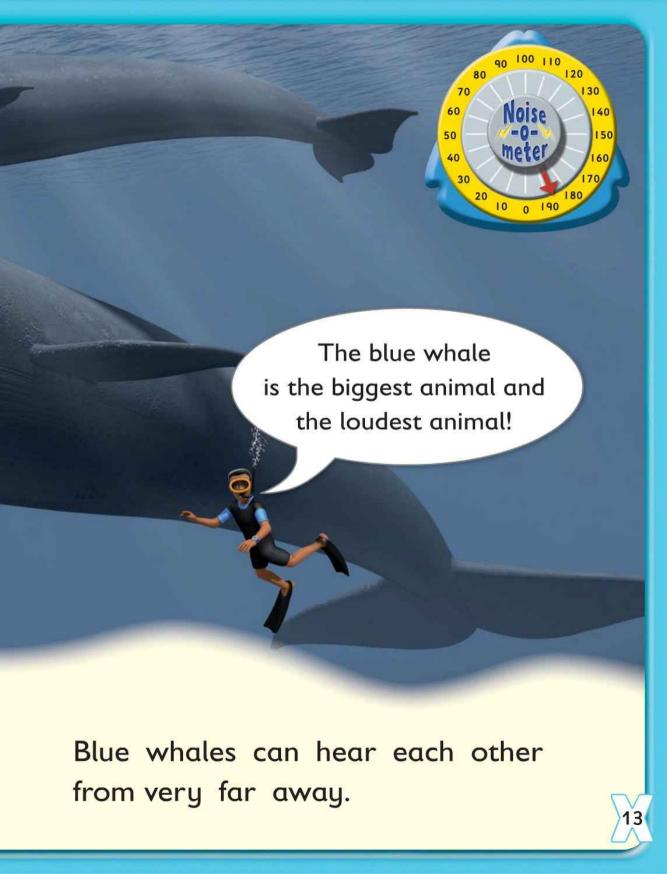

A rocket flying into space makes lots of noise. The engine is so loud it hurts your ears.

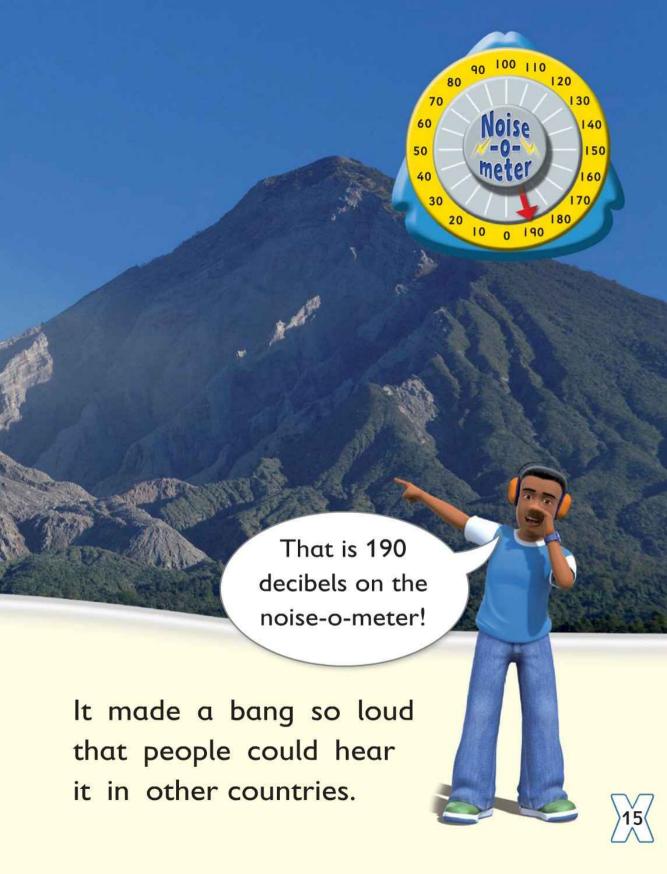

The loudest animal is the blue whale. Whales make noises that can travel long distances under the water.

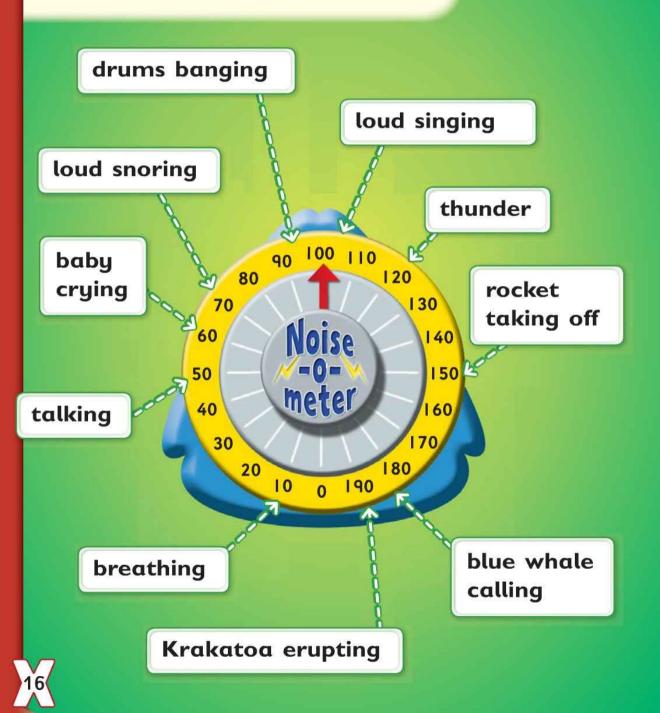

The loudest noise ever heard came from a volcano. The volcano was called Krakatoa (say: crack-a-toe-a).

Making a noise

Talk with your child about the book after reading. Here are some questions you could ask:

- What did you learn about noise?
- Can you remember what animal makes the loudest noise?
- Did you like the book? Why or why not?

Encourage your child to read the book again. This will build their reading confidence and reading fluency.

Other things to do

Keep talking about this book. What other things do you know that make a loud noise?

You could make a simple 'telephone' by using a piece of string to connect the bottom of two plastic cups. See how the sound of your voices travel along the string.
